

The Core Learning Model — For Schools

The Grow Space · a clinically-overseen learning profile and intervention for every student

Careers tools tell a student *what job* to aim for. They don't help the student who is capable but struggling to study. The Core Learning Model fills that gap: it shows each student *how they learn*, hands your staff a clinically-overseen profile, and gives every student a ready-made 3-session study program. It complements careers guidance — it doesn't replace it.

Where it fits

	Typical careers-profiling tool	The Core Learning Model
Core question	What career & subjects suit me?	How do I learn — and what do I do about it?
Output	Ranked job / subject matches	Learning Profile + bespoke 3-session program
Oversight	Algorithmic, self-serve	Designed & overseen by registered psychologists; flagged profiles reviewed
Lens	Aptitude percentiles	Strengths-first (Big Five, VIA, future-of-work)
'Learning styles'	Often still used (VAK)	Explicitly avoided — not evidence-based
Buyer	Careers adviser	Head of Teaching & Learning / Learning Support / Wellbeing

What your students get

- A personalised **Learning Profile**: cognitive strengths (banded), signature character strengths, watch-outs and tailored study strategies.
- “**Your human edge**” — strengths mapped to future-of-work skills, plus “**Careers to explore**” with study pathways.
- A **bespoke 3-session program** (Understand → Build → Practise) — short videos + activities chosen for their profile.
- An optional **parent contribution** woven into the report — bringing families into the learning conversation.

What your school gets (the part careers tools can't give you)

- **Cohort dashboard** — aggregate patterns across a year group (e.g. “a third of Year 10 show working-memory load risk”, common strengths and study-skill gaps). Turns individual data into **teaching intelligence**.
- **Teacher-facing one-pager** per student — how to get the best from each learner in class.
- **Whole-cohort study-skills program** — the 3 sessions delivered to tutor groups or classes, not just 1:1.
- **Psychologist oversight of the cohort** — flagged profiles individually reviewed — plus a **clinician-led debrief**, staff PD, and a pilot case study for your evidence base.

Why it's credible

- Built on Big Five, RIASEC and VIA, plus modern study science (retrieval practice, spacing, metacognition) — and **developed and overseen by registered psychologists** (flagged profiles individually reviewed).
- Australian data residency, age-aware consent, privacy-by-design. **Not** “learning styles”; **not** a diagnosis at this tier.
- (Full detail in our companion ‘Evidence Base’ sheet.)

Getting started

- **Pilot** a single year group or learning-support cohort — we'll set up access codes and a cohort summary.
- **Bulk licensing** for whole-year or whole-school rollout; volume pricing on request.
- Hosted securely at learn.thegrowspace.com.au. Talk to us: greg@thegrowspace.com.au.

“Your careers tool tells students where they might go. The Core Learning Model teaches them how to get there — and shows your staff how each one learns.”
